

ECO SHEETS

PRODUCT INFORMATION

Foil inspired by nature as a green and innovative food packaging solution

An increasingly popular product, which has been developed with a focus on protecting the environment. ECO SHEETS are made of a special compound of Polyethylene, Calcium Carbonate, TDPA and other additives. The product is intended to adequately replace traditional heavier weight paper, paper with laminated polyethylene foil, greaseproof and wax paper which are used for packaging of fresh foodstuffs, sausages, deli products, meats, butter, bakery, candies etc. It is simply, packaging for the very easy packing of fresh food stuffs.

ECO SHEETS Advantages:

- Very strong, universal and lightweight
- Protects foodstuffs against external influences (humidity, water and grease)
- Prolongs the freshness and shelf life in the fridge
- Shape memory, ideally adheres to the product
- Available in transparent or with colour
- Available in 8 colour printing scale- which makes your logo or advertisement more visible
- Suitable for sealing

ECO SHEETS Ecology:

- Biodegradable, recycled material made only from natural substances
- Less energy, water and material consumption during production in comparison with paper products
- Lower emissions of carbon dioxide during transport

ECO SHEETS Economy:

- More cost efficient
- Thinner than paper – less space needed for storage and transportation
- Significant time savings when packing food
